Home Agent's Notes

Elizabeth W. Pancake, Asst. Home Agent

FORTISAN is the finest, yet one of the strongest fibers ever made. It is one of the vegetable fibers and is classified as a rayon. Fortisan has extraordinary dimensional stability (resistance to shrinking and stretching) and is highly resistant to the effects of sunlight and chemicals. The yarn is nearly twice as strong as the rayon cords used to strengthen automobile tires. It has proved difficult to dye and has a rather stiff hand, so it is currently used in blends with other fibers. Fortisan is being woven into curtain and drapery fabrics of great beauty. The fabrics may be machine washed or dry cleaned.

ARNEL is a new ease-of-care triacetate fiber. Depending on how it is woven or combined with other fibers, Arnel can contribute a number of properties to fabrics, the most important is that it can be heat - treated. This process makes possible fabrics that will not shrink or stretch out of fit, that resist wrinkles, even in humid weather, and that hold pleats through many washings. Arnel can be found in many new apparel fabrics and suitings. Most fabrics in which this fiber is used are washable, some by hand, many in automatic washers. Look for the tabel or hang tag to see care instructions.

An Inside Look — Let's Savor the Stuffing:-

This is the year you've promised that the holiday bird will be something to talk about from the inside out — from stuffing to roasting and serving. What's more these stuffing tricks can be the inside secrets to creating almost elegant dishes with meat and fish.

Once your poultry selection is made — turkey, chicken, duck or goose — pair it with a stuffing which best complements it. High on the list of best stuffings will be those using enriched bread cubes, either soft or toasted. Bread, always available, captivates the illusive savor of herbs, spices and fruits which give the stuffing its character.

To choose the perfect stuffing for turkey, a rather delicately flavored meat, select stuffings that enhance rather than overwhelm.

THE MIGHTY CHRYSLER FOR 1957

Here's the glamorous, low-priced 1957 Chrysler Windsor V-8

Announcing the most glamorous car in a generation!

You never looked or felt as good in anything before!

Other cars have changed models . . . this one changes motoring. Look at its rich, racy lines . . . at the long, low silhouette . . . at the dramatic upsweep of the rear fenders that plume back from the waist like the wake of a hydroplane. It's a streak of a car with the elegance of the boulevard and the spirit of the speedway.

Get into this car, drive it into traffic or out on the open highway and you enter a new domain of travel. In the 1957 Chrysler, with its new Torsion-Aire Ride, motion has a new "feel". And wait till you toe the throttle. A new Pushbutton TorqueFlite Transmission teams with a mighty airplane-type V-8 engine, developing up to 325 horsepower, to give you a new high-velocity getaway, matchless passing power when you need it.

Come in this week and visit our showrooms. See and drive the most *completely new* car of the year!

Torsion-Aire Ride
pours the road under you!

Try Chrysler's new Torsion-Aire Ride and you'll think some of the laws of gravity, motion and inertia have been suspended in your favor. No more rock and roll. No more pitch when you stop. Chrysler's new torque rod suspension and lower center of gravity give you a brand new ground-skimming "feel" of the road. The wheels ride the contours . . . but you *don't*. The road just pours under you.
